

AP Stamp

Entry Level Analyst

POSITION SUMMARY

AP Stamp's consultants, engineers, and analysts are experts who work with utilities and asset management companies to implement technological change and project delivery within the nation's critical energy systems. Analysts are responsible for supporting project management teams by developing plans, managing project workflow, providing engineering support, preparing project reports, conducting analyses, and coordinating with team members, clients, and stakeholders.

WHAT WE ARE LOOKING FOR

- Bachelor's degree in engineering, science, or business
- Strong and organized analytical decision making
- Ability to solve complex and practical engineering problems
- Interest in the energy utility industry
- Self motivated to complete projects and grow professionally
